

Precision Z Stage

Type SMH

Height adjustable slide

Technical data

height stroke (standard)	1 - 5 mm
width (standard)	30 - 300 mm
length (standard)	65 - 410 mm
dyn. load (standard)	300 - 12.500 N

Drive options

- motorized
- manual, with micrometerscrew

Control System

- compatible with the ERO control
- individual control of the motors

Surface options

- chemically nickel-plated
- special coating for very low light reflection

More options

- individual drilling pattern
- multi-axis design
- can be combined with the ERO modular system

Main advantages

- flexible adjustments possible
- long service life
- can be combined with the ERO modular system
- ERO-Führungen as a partner with over 50 years of experience in linear technology

We make it moving
